Deck Mounted Skylights – The No Leak Skylight

VSE | Electric Venting Skylights

VS | Manual Venting Skylights

Superior LoE³ Glass
Advanced LoE³ coating provides more daylight and better heat control for year-round comfort and energy savings.

- Visible light transmittance improves 10%.
- Solar heat gain improves 20%.

Patent-pending VELUX "Deck Seal" provides an air and water barrier for a leak-proof installation. The 1¼" flange/bracket sits directly on the roof deck with no gaps, providing an air and water barrier around the skylight opening.

Maintenance–free white frames and sashes provide for a high quality finish that eliminates the need for secondary high cost trips by a painter.

Factory installed mechanism for venting manual and venting electric skylights eliminate the need for field installation operators and multiple wire connections.

Mortise and tenon joints for stability in the frame.

Comes with 20 feet of standard wire. (VSE)

Other features

New neutral grey colour and curved profiles blend with houses of today and past.

Rain sensor closes skylight at first drop of rain (VSE).

Self programming RF remote with smart home automation capabilities.

Pre-mounted ***Pick&Click!***™ system brackets make the installation of sunscreen blinds literally a snap.
